

Senior MERN Stack Developer

Location: Chennai, Tamil Nadu, India

Experience Required: 3+ Years

Employment Type: Full-Time

About the Role

We are looking for a passionate and experienced Senior MERN Stack Developer to join our growing technology team. The ideal candidate should have strong expertise in full-stack web application development using the MERN stack — MongoDB, Express.js, React.js, and Node.js.

The candidate will be responsible for designing, developing, optimizing, and maintaining scalable web applications while collaborating with cross-functional teams to deliver high-quality solutions. The role also requires familiarity with modern AI-powered development tools to improve productivity, code quality, and development efficiency.

Key Responsibilities

- Design, develop, test, and maintain scalable full-stack web applications.
- Build responsive and user-friendly frontend interfaces using React.js.
- Develop robust backend APIs and services using Node.js and Express.js.
- Design and manage MongoDB databases, schemas, and data models.
- Integrate third-party APIs and external services.
- Write clean, reusable, maintainable, and efficient code.
- Optimize applications for maximum speed, scalability, and security.
- Troubleshoot, debug, and resolve technical issues efficiently.
- Collaborate with UI/UX designers, QA teams, product owners, and other developers.
- Participate in code reviews and ensure adherence to coding standards and best practices.
- Mentor junior developers and contribute to technical discussions.
- Work with version control systems and deployment processes.
- Stay updated with emerging technologies and industry trends.
- Effectively utilize AI-powered development tools for coding assistance, debugging, documentation, productivity improvement, and development acceleration.

Required Technical Skills

- Strong hands-on experience with React.js, Node.js, Express.js, and MongoDB.

- Proficiency in JavaScript (ES6+) and TypeScript.
- Good understanding of RESTful APIs and asynchronous programming.
- Experience with Redux or Context API.
- Knowledge of HTML5, CSS3, Tailwind CSS, Bootstrap, or similar frameworks.
- Experience working with Git and version control workflows.
- Familiarity with JWT and OAuth authentication mechanisms.
- Knowledge of database optimization and performance tuning.
- Understanding of CI/CD pipelines and deployment practices.
- Familiarity with AWS, Azure, or GCP is an added advantage.
- Experience with Docker or containerized applications is a plus.
- Knowledge of testing frameworks such as Jest, Mocha, or Cypress is preferred.

AI Tool Familiarity

- ChatGPT
- GitHub Copilot
- AI-based code review and debugging tools
- AI-assisted documentation and productivity tools

Preferred Qualifications

- Bachelor's degree in computer science, Information Technology, or a related field.
- 3+ years of experience in full-stack web application development.
- Experience working in Agile/Scrum development environments.
- Strong problem-solving and analytical skills.
- Good communication and collaboration abilities.
- Ability to work independently and as part of a team.

Why Join Us?

- Opportunity to work on modern and scalable applications.
- Collaborative and innovation-driven work environment.
- Exposure to the latest technologies and AI-assisted development practices.
- Career growth and learning opportunities.
- Supportive and dynamic technical team.

How to Apply

Interested candidates can share their updated resume and portfolio/projects to the HR or recruitment team.
